

Preference Hub

Enhance communication with HCPs

Preference Hub is an advanced preference management solution designed to enhance communication with HCPs. Unlike basic opt-in/out systems, Preference Hub provides HCPs with flexibility to tailor their communication preferences, ensuring compliance while offering valuable insights into their priorities and behaviors.

With built-in integration capabilities, Preference Hub synchronizes preferences across platforms like Salesforce Marketing Cloud and Veeva Approved Emails. It empowers commercial teams to deliver targeted, relevant content while reducing manual effort and compliance risks.

Benefits

-  **Comprehensive Compliance:** Automates CAN-SPAM compliance across all channels.
-  **Personalized Engagement:** Allows HCPs to customize preferences, improving communication relevance.
-  **Integrated Insights:** Centralized repository provides actionable data for strategic decision-making.
-  **Operational Efficiency:** Reduces manual intervention and errors with automated preference tracking.
-  **Seamless Integration:** Prebuilt API connectors support multiple systems, enhancing scalability.

Use Preference Hub to:

- **Enhance** HCP engagement through personalized content.
- **Optimize** campaign targeting using preference-driven insights.
- **Ensure** seamless compliance with privacy regulations.
- **Simplify** preference management across platforms.

Delivery

Preference Hub is accessible via a secure online portal and integrates with major CRM and marketing automation platforms. Its flexible API framework ensures compatibility with various systems, enabling efficient data synchronization and communication management.
